COMPLEMENTARY SERIES VIBRATOR MOTOR

YZL 立式振动电机 Series YZL vertical type vibrator motor

本系列振动电机由立式电机和激振机构组成，所产生的回旋激振力通过电机圆锥面传递给振动机械，使振动机械产生平旋型圆振动和空间摇晃振动的复合工况，可作为各种振动筛、振动磨机、振动光节处理机、振动混料机 etc 平旋型或复旋型振动机械的激振源

The series vibrator motor is composed of vertical motor and vibrator mechanism, the circular vibration force produced by the motor delivers to vibrator machine by upper and lower foot coning plane of the motor. So the vibrator machine produces composite movement of plane circular vibration and space sway vibration. Therefore, this series vibrator motor can supply vibrator source for the plane rotation or composite rotation machine, such as vibrator sizer, vibrator grinder, vibrator polishing machine, vibrator mixing machine, etc.
